

ATLAS Open Data: Project Instructions

Ivo van Vulpen, Paul de Jong,
Ashley McDougall, Rahul Balasubramanian

May 2020

1 Making a GitHub account

In order to access the code, you first must make a GitHub account. If you already have one, skip ahead to section 2.

1. Go to: <https://github.com>
2. Fill in the registration form. You'll need to join with a valid email address.
3. Fork the branch: The idea is you make a fork of our master. And then the can change their code.

2 Launching the binder

How to open the binder environment.

3 A simple example

Instructions to run them through a simple example, before starting their main analysis project (common to both projects).
